Claims:

...of the lookup tables, and then sporadically (i.e. on a monthly, quarterly, or yearly schedule) to refresh the lookup tables. Analysis module 20 includes predictive model 4 and rules based...or abusive. The model can be supervised if known cases of fraudulent providers and their attendant probability profiles are known. If identified examples of fraud are not available in sufficient quality and...start and end dates. Adjustments to the sequences were made in order to account for overlaps due to incorrectly entered dates in the data or client transfers, the latter occurring in hospice visits. The hospice claims sometimes overlapped a hospital visit, meaning a client 17might have spent some time in a hospital... the claims data and sorted as described earlier for the facilities. In this case no overlap adjustments are needed and no episodes need to be determined. The spell, in this scenario...or more specific states. In establishing such series of consecutive states, some definitions may cause overlap in two or more states, thereby confusing the exact nature of the individual state of the client at a given time point. If such overlaps do occur, filtering process 3002A will resolve them and thus produce a clean suite of... ...follows a precedence rule of states, e.g. if a hospice state and hospital state overlap, then assign the claim to ...This type of filtering rule generally selects the more significant state from two or more overlapping states; significance can be based on average costs associated with various states, length of stay...similar to the one described above to determine episodes of care. Adjustments are made for overlaps as necessary,
